LIFE ENHANCING WINDOW

# LIFE ENHANCING WINDOW

Our life enhancing window was specifically designed to address the needs of people with limited mobility. Windows can cause difficulties, as some people with limited mobility are unable to comfortably utilise the standard window handle on the side of the frame. By positioning the handle at the bottom of the window, this turn and tilt system gives the user continuous access to the handle, allowing them to open and close the window with minimal effort.

Our life enhancing window is compatible with all our ST windows systems and has multipoint locking facilities for added security. This system comes with a choice of thermally efficient polyamide cores ranging from (15/16" – 1-3/4"). Depending on the system, the glazing aperture can vary from 1-1/8" – 2-1/16", allowing a choice of infill panels to suit thermal and acoustic performance requirements.

### LIFE ENHANCING WINDOW FEATURES

- Includes multipoint locking for added security
- Superb thermal performance, opening in or out
- Excellent thermal performance
- Eco-friendly polyamide core
- Glazing variants are 1-1/8" to 2-1/16"
- Can be pre-assembled in-house, saving installation time/cost
- Available in dual colour finish
- Matching rebate doors available
- Fully tested to current ASTM standards
